Freely available

Play Windows Media files in your
QuickTime Player

FREE Download

With Windows Media® Components for QuickTime, by Flip4Mac™, you can play Windows Media files (.wma and .wmv) directly in QuickTime Player and view Windows Media content on the Internet using a Web browser.

Optimized for High-Definition Playback

Windows Media® Components for QuickTime has been highly optimized for Power Mac G4 and G5 and Intel computers and supports playback of high-definition Windows Media video files.

Upgrade to Advanced Features

Windows Media playback is provided free of charge. By purchasing an upgrade directly from Flip4Mac, you can import Windows Media files for editing and create Windows Media files for distribution. To learn more about these advanced features, visit the [Flip4Mac Web site](#).

Note This product doesn't support content that is protected with Windows Media digital rights management (DRM).
