CONSULTANT NEONATOLOGIST  
KING EDWARD MEMORIAL HOSPITAL  
UNIVERSITY OF WESTERN AUSTRALIA

PROF CHEAH FOOK CHOE  
CONSULTANT NEONATOLOGIST  
UKM MEDICAL CENTRE

ASSOC. PROF DR ROHANA JAAFAR  
CONSULTANT NEONATOLOGIST  
UKM MEDICAL CENTRE

DR SHAREENA ISHAK  
PAEDIATRIC SPECIALIST  
UKM MEDICAL CENTRE

DR SEE KWEE CHING  
NEONATOLOGIST  
HOSPITAL SUNGAI BULOH

DR KHAIRUL FAIZAH  
CONSULTANT PAEDIATRIC CARDIOLOGIST  
(INTENSIVE CARE)  
INSTITUT JANTUNG NEGARA

Stabilization of the newborn infant with respiratory difficulties in the delivery room is of paramount importance for subsequent optimal outcome. With recent developments in the area of newborn resuscitation and ventilation, it is timely that this workshop is organized to update medical and nursing practitioners on the current evidence and recommended practice.

With remarkable improvement and refinement in technology, it is essential that neonatal practitioners familiarize themselves with the available equipment and be adept with handling them, thus, enabling employment of the right strategy and approach in the management of the various newborn lung diseases while minimizing lung injury.

The workshop emphasizes on current and practical approaches of day-to-day resuscitation and ventilation of the newborn infant and will have hands-on sessions with ample time to discuss with the panel of experts on commonly encountered issues.

All medical and nursing practitioners who attend to newborn infants who may encounter respiratory difficulties at birth, require resuscitation and ventilatory support are welcomed.

Please bring queries along for discussion or provide us with the queries before the workshop.

Recommended accommodation:

Cititel Midvalley 603-2296 1188

Hotel Maluri 603-92878833

Hotel Caliber 603-9131 6322

International Youth Center 603-91719204/5/7

## DAY 1: 24TH SEPTEMBER 2010

TIME	LECTURES	SPEAKERS
0800-0900	Registration	
0900-0915	Opening Remarks	Prof Cheah
0915-1000	NRP—the past and current guidelines, evolving changes	Dr Shareena
1000-1045	Resuscitation using air—current evidence	Dr See
1045-1115	TEA BREAK	
1115-1200	Targeting oxygen saturation during resuscitation— a pragmatic or purely scientific approach?	Prof Cheah
1200-1245	Thermal stabilization during resuscitation for term and preterm infants	A/P Dr Rohana
1245-1425	LUNCH	
1425-1630	Meet the experts session— “hands-on”, trouble-shooting and use of bedside resuscitation equip-	
1630-1700	TEA BREAK	

## DAY 2: 25TH SEPTEMBER 2010

TIME	LECTURES	SPEAKERS
0800-0900	Individualizing ventilatory management of neonatal respiratory distress	Prof Jane Pillow
0900-1000	HFJV—the science and practical approach & case illus-	Video presentation
1000-1015	TEA BREAK	
1015-1115	Neonatal ventilatory strategies: Looking ahead to next decade	Prof Jane
1115-1215	Nitric Oxide and ECMO therapy in newborn hypoxic respiratory failure	Dr Khairul Faizah
1215-1300	High frequency oscillatory ventilation—tips and tricks for optimizing care of the baby on HFOV	Prof Jane
1300-1400	LUNCH	
1400-1600	Hands-on handling of mechanical ventilators, HFOV, HFJV and nitric oxide delivery systems	
	Learn to set ventilators and how to troubleshoot commonly encountered problems	
1630-1700	TEA BREAK
