

Road Traffic Accident Study Day I - A Challenge to Medical Field

Road traffic accident (RTA) is a major public health issue in Malaysia as it caused high mortality and morbidity rates. Most of the fatalities were motorcyclists. Road traffic safety programme requires intensive efforts for effective and sustainable prevention. This seminar is the only one of its kind in this region as it addresses the healthcare workers who deal with RTA victims every day. The 'Road Traffic Accident Study Day' seminar is divided into two parts:

The Road Traffic Accident Study Day I - A Challenge to Medical Field (4th-5th Dec 2008)

The Road Traffic Accident Study Day II – What a young rider/driver should know (23rd Jan 2009)

Part I is targeted to the healthcare personnel and those who have interest in trauma and Part II is for the public particularly the secondary school students. It is our hope to bring everyone together; the medical and healthcare personnel, academics, researchers and policy makers to share and exchange ideas in managing injuries inflicted in RTA.

Speakers

Dr Simon Holmes
Consultant in Oral and Maxillofacial Surgery,
The Royal London and St. Bartholomew's Hospital

Prof. Dato' Ir. Dr. Radin Umar Radin Sohadi
Director General, Department of Higher Education,
Former Director General of Malaysian Institute of Road
Safety Research and Professor in Road Safety Engineering

Professor Dr. Ahmad Sukari Halim
