

InfoSci®-Books

www.igi-global.com/eresources

ISB

The premier research database featuring over 1,400 scholarly works in information technology and computer science.

InfoSci®-Books is a fully-searchable database providing access to chapters from every book and reference work IGI Global has published since the year 2000. InfoSci®-Books allows access to over 40,000 possible full-text search results on technology applied to business, public administration, engineering, education, medicine, healthcare, and social science.

Important Features:

- > Over 40,000 full-text chapters from 1,400+ scholarly books and reference works
- > More than one million reference citations for further research
- > No embargo of content included in the database
- > MARC records available at no charge
- > Unlimited simultaneous access 24/7 with no limitations
- > Precise search and retrieval through chapter-level abstracts and indexing
- > Updated continuously as new IGI Global books go to press
- > Electronic version of all documents available before print release
- > Unrivalled among scholarly publishers in coverage of information science & technology research applied to hundreds of disciplines
- > Perpetual, current-year purchase, and annual subscription options available
- > Discounts for consortia and other multi-site groups
- > Priced at a fraction of the combined print value!

Accolades

“...the user base is made up of IT professionals and researchers who are in effect the developers and publishers of these products. They know what they want out of the database and how they want it to work. In short, the developers and the users of the database speak the same language and it can be expected that the two sides would understand each other more than any other situation...”

- Gita Gunatilleke, Charleston Advisor
July 2009

“Superior search tips make this one of the easiest research tools for students and researchers.”

- Judi Copler, MLS Board of HealthInfoSys
and Advantage Ventures, USA

Platform Features:

- > XML-powered research content enabling full-text searching, including a ranking system, increased search options (basic, advanced, subject), scaffolding to display search patterns, and several options to refine your search with filtering
- > Full-Text XML/HTML and PDF viewing options that allow for easy navigation using hyperlinks and tags, with both chapter and complete title viewing options and liberal DRM
- > A single personalized gateway to view and search your institutions' entire IGI Global research collection
- > Z39.50 compliant
- > Complimentary downloadable MARC records
- > Open URL compliance
- > Persistent URLs
- > General citations to RefWorks
- > CrossRef accessibility
- > COUNTER compliant usage statistics
- > Customized Librarian Corner with exclusive administration tools

An Essential Resource for:

- Academics, researchers, and practitioners in computer science and information technology management and a wealth of other fields impacted by technology
- Students and teachers
- Distance and online learning practitioners
- Business professionals
- Medical personnel
- And more...
