

Seminar on Using SAS for Data Mining and Data Analysis (8th Sept 06)

We are a multinational software company established in Malaysia since 1986. During the past 20 years, we have serviced and supported large corporations with enterprise scale Data Mining and Data Analysis project. In Malaysia, we have about 150 customers and these clients are large corporations with large volume of data such as INTEL, Citibank, Telekom, Maxis, Lembaga Hasil Dalam Negeri and etc. We are pleased to share with you on what is the latest demand from industry and how your research can be tailored towards industry applications as well as our support for universities.

During this seminar, we will share with you on our collaborations with local and overseas universities as well as our support for academicians.

You are invited to join us in our upcoming seminar. Please find the details as follows:
